Why Large AI Units Wait

Beside a 1,024-Token Unit, Decoding Ends After the Deadline

When the Conventional Receiver Finishes

ms After the Samples, 99.9th Percentile

Size of the AI Unit That Runs Beside the Decoding Cells

The Rule

Beside a Decoding Cell:
Small and Medium Units

Only While No Cell of the GPU Decodes:
Large Units

Layer-1 Misses, Runs of 10 s	Share of TBs
Without the Rule	0.061%
With the Rule	0.036%
Server Without AI	0.032%

In the Steady State of 100-s Runs
No Difference Was Measured.
The Rule Is a Conservative Default.
